

FIT AND FERTILE

CANINE REPRODUCTION AND HEALTH SUPPLEMENTS

MOTHER & PUPPY STARTER

Especially tailored complete nutrition recipe that provides mother and puppy with all essential nutrients

This tailored, tasty, wet food has an ultra-smooth texture that is designed for the developing digestive system of puppies from the age of 2 weeks and their development to help ease the transition to solid foods. Mother & Puppy Starter is extremely nutritious and is also ideal for pregnant bitches during the final third of pregnancy as well as whilst nursing.

The omega-3 fatty acids (DHA) helps to support a brilliant canine mind - brain development and boost your dog's learning abilities during early training. Vitamins C and E can also be helpful in supporting the body's natural defences.

Thanks to a special nutrient combination of beneficial prebiotics, nucleotides yeasts extract and highly digestible protein encourages optimal balance in the gut microbiome and normal digestion. Also supports the immune system for growth development, healthy joints and skin.

Fit And Fertile Supplements are manufactured to the highest quality control standards and production techniques. They are manufactured in a VMD-licensed facility following GMP standards, are accredited by both UFAS & FSSC 22000, so you can be assured that they meet the highest quality standards.

Must be kept sealed, and stored in a dry place away from heat and sunlight. Close firmly each time after use and keep out of reach of children. Use only in accordance with instructions.

FEEDING GUIDE

Transition from Mothers milk to something different can be a difficult task! We advise that once the Puppy Starter Formula is made as per the guide below, help to encourage the pup by putting the formula under their lip or on your finger so they get a taste and begin to lap.

FEEDING GUIDE PER PUPPY (av. puppy)

Feed 3-4 hours depending on Mothers milk production and adjust accordingly if required. 3x 15ml scoops of Puppy Starter mixed with 2x 15ml scoops of water. Mix well. As the pup grows add an additional scoop of powder with an additional scoop of water to make the Puppy Starter into a thicker porridge.

FEEDING GUIDE FOR MOTHER

2 times per day whilst pregnant and nursing. 6x 15ml scoops of Puppy Starter mixed with 4x 15ml scoops of water. Mix well. Can be added to her normal food or as a standalone meal.

Clean drinking water should always be available.
